Company Background

Agiline is a software development company based in Southern California. We are a full service consulting, design, and solution company geared toward business outcome. Our experienced team of consultants and developers are here to facilitate every aspect of your custom software solution. Agiline prides itself on being a full service business vertical application solution company. From the simple data portability of legacy systems, stand-alone application design, or complex enterprise-based solutions, Agiline provides reliable, quality, customized software application development and implementation. Agiline is here to meet your specific business needs with affordable software solutions.

Our team of highly experienced software engineers take pride in every aspect of your project. Whether it is from solution consulting to fully customizable vertical applications. We pride ourselves on taking accountability for ensuring quality and providing our customers with service that is beyond expectation.

Agiline is a Microsoft Gold Partner, partnering with many government organizations and businesses seeking optimization through the innovative application of technology.

Our guiding principles are customer satisfaction with a strong focus on providing cost effective, reliable, and innovative technology to solve our customers' business challenges.

WHY AGILINE?

- ### The "Right Size"

Yes, size does matter. We are large enough to provide stability and a full range of resources, yet small enough to be flexible and responsive to your needs. It's a rare combination to get – the right mix of big and small! This helps our clients to reap the benefit of staying on budget and enjoy the comfort of complete customization, as per their specific requirements.

- ### Integrated Strategy, Design and Development

The decade long experience in the software development domain has made us better year after year. The wisdom gathered while delivering a variety of development projects over the years guides us to offer you scalable software solutions that are extremely reliable with the highest quality and predictability. The integrated strategies that we follow are practical, our applications are efficient and user-friendly, and our technical solutions are flexible and easy to maintain.

- ### Qualified Expertise

Expertise for us does not just mean technical expertise. With technical expertise at the core, we also pay due attention to project and risk management. This is the differentiator that has set us apart and fortified our reputation year after year. Our team includes senior, experienced program managers, designers, information architects, developers, and engineers, who effectively addresses every aspect of software development, providing complete peace of mind to the clients.

- ### Quality Assurance

Quality Assurance rules the game at Agiline, be it during the development, release, or deployment process. Ensuring optimum quality has always been our way of life at Agiline. Our quality control system ensures that the clients' requirements are precisely met and the project remains within defined time frame and budget. This has cemented our credibility among our clientele and the industry.

- ### Comprehensive Solution and Long Term Partnership

Our solutions are comprehensive. We follow the complete software development life cycle from business analysis to quality assurance and from deployment to post-launch maintenance. We own the complete responsibility of the process and provide the clients with complete solutions. We believe in long term relationships, hence, we not only help develop and deploy software and solutions, but also are available to support the applications we develop. Our customer support packages ensure that your application will always be improved and supported.
