

SharePoint *FITNESS ASSESSMENT*

SharePoint is designed to help businesses like yours, and Agiline is an expert at tailoring SharePoint to manage documents, department correspondences, workflows, projects, and much more. The boost in productivity and time savings experienced by our customers has improved efficiency, provided insight and directly produced significant cost savings.

Why complete the Agiline SharePoint *Fitness Assessment*?

- **Low Utilization:** Not drawing the expected use.
- **Missed Expectation:** Not showing the value or rewards anticipated.
- **Slow or Clunky:** Performance issues, including content management, workflows, latency, etc.
- **Security Mishaps:** Environment improperly configured for adequate safety and security.

What will be assessed?

Agiline's SharePoint *Fitness Assessment* is a comprehensive review of your current SharePoint environment. You receive an actionable plan for overall improvement and increased performance of your SharePoint platform. The work can be performed entirely remotely.

Assessed areas include:

- Operating System Health
- SharePoint Setup & Configuration
- SharePoint Security
- SharePoint Functionality
- Database
- Site Collection / Site Review
- Services
- Migration Strategies
- Reports

How much time and what is the cost?

We offer two options providing you time and price flexibility:

Fitness Assessment

- Time: 1 week
- Cost: \$1,500 (two servers included; plus \$250 for each additional server)

Fitness Assessment Pro

- Time: 2 weeks
- Cost: \$3,000 (two servers included; plus \$450 for each additional server)

Please contact us at (909) 605-2729 or info@agiline.com with any questions, request for additional information or to schedule your Assessment.
